Maximum Deflection of Beam Under Unit to be 1/360 of Unit Length Not to Exceed 1/2" [13mm].

Deflection may be calculated by using 55% of the operating weight as support beams and anchor hardware are to be furnished by others. Beams must be located under the full length of the pan section. A uniform load on each beam. See certified print for operating weight. Beams should be sized in accordance with accepted structural practices.

Supporting Beam Surface must be level. Do not level the unit by placing shims between the Unit Mounting Flange and the supporting beam.
