Commercial HVAC | Industrial Refrigeration | Power Generation | Industrial Process

EVAPCO for LIFE

EVAPCO is more than a name. We are the global innovator in heat transfer solutions for the Commercial HVAC, Industrial Refrigeration, Power and Industrial Process markets. We pledge to make everyday life easier, more comfortable, more reliable and more sustainable for people everywhere.

OUR COMMITMENT

We never stop innovating. We set out to find groundbreaking solutions that transform the way the world works for the better. It's why we have more than 500 active patents worldwide. We also guarantee performance and put every solution through rigorous research and testing to ensure maximum efficiency and reliability.

PROTECTING THE ENVIRONMENT

Innovation and environmental sustainability go hand-in-hand at EVAPCO. Our industrial heat transfer equipment not only conserves natural resources and helps reduce noise pollution, but also features recycled steel content in construction. Our stainless steel units are constructed of panels that contain up to 65% of recycled content and our galvanized units contain over 79%*. From sound reduction to water conservation to chemical elimination, we are developing new technologies that deliver ultimate operating advantages to our clients while protecting the planet for every generation to come.

**Applicable to US manufactured product.*

evapco for LIFE

Thank You for Your Interest in EVAPCO.

Around the world, our customers rely on EVAPCO to solve their most demanding heat transfer and cooling needs. Our mission is to deliver reliable, efficient and sustainable solutions that help our customers succeed. For 50 years, EVAPCO has been recognized as a leader in the innovation and development of advanced heat transfer technologies that address the evolving needs of the Industrial Process, Industrial Refrigeration, Power, and Commercial HVAC markets worldwide.

This Global Product Catalog showcases our Full Spectrum of heat transfer solutions, ranging from fully evaporative and hybrid to adiabatic and fully dry technologies. From the smallest factory-assembled units to the world's largest field-erected heat rejection solutions, our products are designed to deliver exceptional performance and efficiency across a broad range of applications and operating environments. With our breadth and depth of product capabilities and technical expertise, we strive to be your consultative partner in choosing a heat transfer solution that optimizes your project-specific needs.

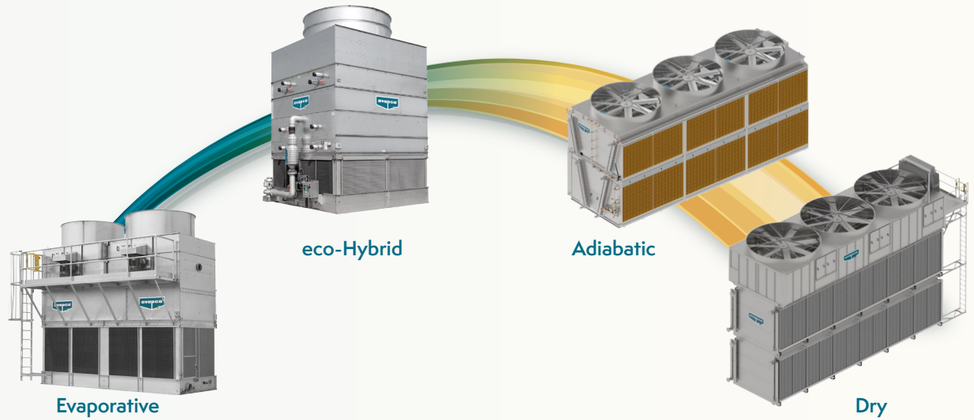

EVAPCO products are manufactured on a global scale to the highest quality standards and supported by a global team of dedicated and passionate employees and sales representatives. Our goal is to be your most trusted partner. Our EVAPCO for Life philosophy reflects this long-term commitment to delivering value, expertise and world-class support from project infancy through the life of the equipment.

We look forward to partnering in your success.

With sincere appreciation,

Pat Strine, Jr.
President & Chief Executive Officer

FULL SPECTRUM GLOBAL SOLUTIONS

EVAPCO provides a full spectrum of global product solutions for the Commercial HVAC, Industrial Refrigeration, Power Generation and Industrial Process markets.

From the smallest factory assembled cooling tower to the largest field erected air-cooled steam condenser, we offer heat transfer products designed to meet the water and energy requirements for any project. We are committed to providing solutions that are energy efficient and conserve water.

Our latest heat transfer solutions are the factory-assembled eco-Air Series of Dry Coolers, Air Cooled Condensers and Adiabatic Coolers and Condensers. The eco-Air Series completes our successful eco-family of closed circuit coolers and condensers with water-saving dry and adiabatic technology.

As an industry leader in third-party performance certifications, our fully-rated products enable you to operate your cooling systems efficiently and with complete peace of mind.

EVAPCO's eco-Air™ Double Stack Dry Coolers Installed at a North American Data Center

RESEARCH & DEVELOPMENT

For 50 years, innovation has been at the core of EVAPCO's success. Through continuous investment in research, testing, and engineering excellence, EVAPCO has developed industry-leading heat transfer solutions that deliver performance, reliability, and sustainability worldwide.

At the heart of this commitment is the **Wilson E. Bradley Research & Development Center** in Taneytown, Maryland. Spanning more than **100,000 square feet** of indoor and outdoor testing space, the facility serves as a global hub for product development, performance validation, and technology advancement across the Commercial HVAC, Industrial Refrigeration, Power Generation, and Industrial Process markets.

The research campus features **nine specialized laboratories, including six environmental test chambers,** providing engineers with the ability to evaluate products under a wide range of real-world operating conditions. Advanced testing capabilities include thermal performance validation, refrigeration system development, fan performance analysis, durability testing, materials evaluation, and full-scale equipment qualification.

Backed by over **500 active patents worldwide**, EVAPCO continues to pioneer innovative technologies that help customers improve efficiency, conserve water and energy, reduce operating costs, and meet evolving sustainability goals. From concept and design to testing and validation, every EVAPCO product is developed with a commitment to delivering the highest standards of quality, performance, and long-term reliability. Through a culture of innovation, rigorous research, and continuous improvement, EVAPCO is helping shape the future of heat transfer technology, one breakthrough at a time.

CLOSED CIRCUIT COOLERS

Dry & Adiabatic

Available in a wide range of footprints, motor types, control options and capacities, this complete line of Air Cooled/Dry & Adiabatic products offers maximum water savings, reduced maintenance, and simplified operation.

eco-Air™ Flat Dry Cooler
Flat Air Cooled Fluid Cooler

eco-Air™ V Dry Cooler
Air Cooled V Fluid Cooler

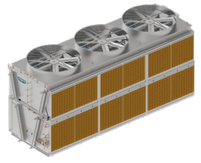

eco-Air™ V Adiabatic Cooler
Air Cooled V Fluid Cooler with Adiabatic Pads and Optional PuRe-JET™ Pumpless Adiabatic Recirculation System

eco-Air™ V Spray Cooler
Air Cooled V Fluid Cooler with Adiabatic Spray System

eco-Air™ Double Stack Dry Cooler
Air Cooled High Capacity Fluid Cooler

eco-Air™ Double Stack Adiabatic Cooler
Air Cooled High Capacity Fluid Cooler with Adiabatic Pads

eco-Air™ Double Stack Spray Cooler
Air Cooled High Capacity Fluid Cooler with Adiabatic Spray System

eco-Air™ APEX™ Dry Cooler
Air Cooled High Capacity Fluid Cooler

Factory Assembled Induced Draft

Closed Circuit Coolers provide incredible cooling efficiency. Easier to maintain than open system cooling towers, EVAPCO's closed circuit coolers are an excellent option for any cooling system.

ATWB
Advanced Technology Closed Circuit Cooler

eco-ATWB
Water Conserving Advanced Technology Closed Circuit Cooler

eco-ATWB-H
Optimum Wet/Dry Hybrid Advanced Technology Closed Circuit Cooler

ESW4
Energy-Efficient Counterflow Closed Circuit Cooler

PHW
Parallel Hybrid Crossflow Closed Circuit Cooler

Factory Assembled Forced Draft

The LSWE and LRWB are the industry standard in low-sound, centrifugal fan, forced-draft closed circuit coolers.

LSWE
Low Sound Centrifugal Fan

LRWB
Low Profile | Low Sound Centrifugal Fan

These water saving eco-units offer improved dry operation on projects with indoor/ducted or confined layouts and low sound requirements.

eco-LSWE
Low Sound Water Conserving Centrifugal Fan
Increased Dry Cooling Capacity

eco-LRWB
Low Profile | Low Sound Water Conserving Centrifugal Fan
Increased Dry Cooling Capacity

ATWB Closed Circuit Cooler with optional Smart Shield Water Treatment System

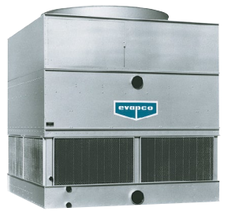

COOLING TOWERS

AT Cooling Tower installation with optional features

Factory Assembled Induced Draft

EVAPCO's state-of-the-art induced draft cooling technology delivers superior operating advantages in any climate. From performance to maintenance, these solutions simply work harder. Choose either a counterflow or crossflow cooling tower, whichever best suits your project needs.

AT
Counterflow Cooling Tower

AXS
Crossflow Cooling Tower

Modular Induced Draft

Designed in large modules for ease of installation and reduced field assembly, the AT Atlas is one of the most energy efficient modular cooling towers on the market.

AT ATLAS
Modular Counterflow Cooling Tower

Factory Assembled Forced Draft

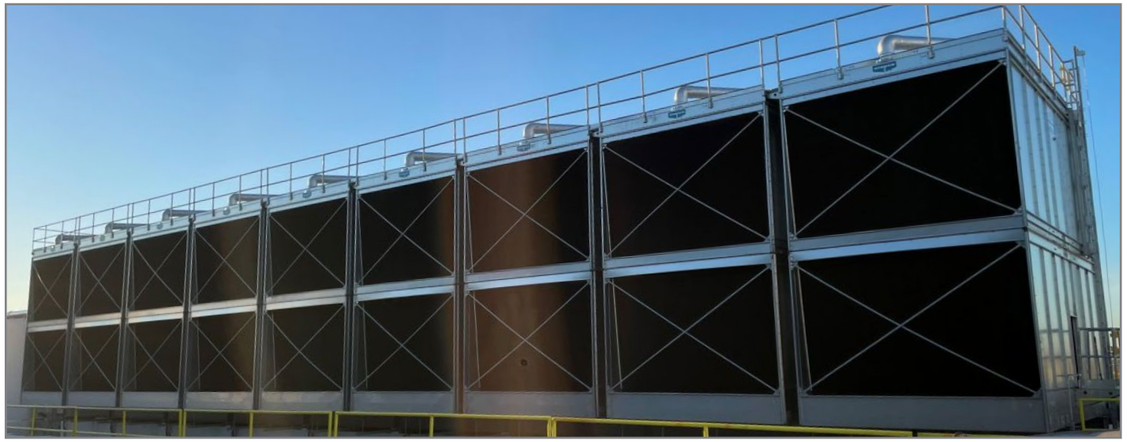

These centrifugal fan cooling towers are utilized in low noise, high static, or ducted applications and are a good solution for tight enclosures.

LSTE
Low Sound Centrifugal Fan Cooling Towers

LPT
Low Profile | Low Sound Centrifugal Fan Cooling Towers

AXS Crossflow installation

AT Atlas installation

CONDENSERS & GAS COOLERS

Dry & Adiabatic

Available in a wide range of footprints, motor types, control options and capacities, this complete line of Air Cooled/Dry & Adiabatic products offers unparalleled flexibility.

eco-Air™ Flat Series
Air Cooled Condenser
Or Gas Cooler

eco-Air™ V Series
Air Cooled Condenser
Or Gas Cooler

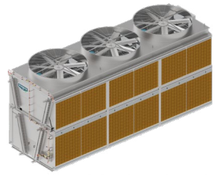

eco-Air™ Adiabatic Series
V Series Air Cooled Condenser
Or Gas Cooler with Adiabatic Pads and Optional
PuRe-JET™ Pumpless Adiabatic Recirculation System

eco-Air™ Spray Series
V Series Air Cooled Condenser with
Adiabatic Spray System

eco-Air™ Double Stack
Air Cooled Condenser

eco-Air™ Double Stack Adiabatic
Air Cooled Condenser with Adiabatic Pads

eco-Air Adiabatic Double Stack

ATC-E Evaporative Condensers with optional external service platform

Factory Assembled Induced Draft

EVAPCO condensers are equipped with low pressure drop and high capacity Thermal-Pak® II Coil design. The patented Ellipti-fin® coil technology further enhances our industry leading performance while saving on water consumption.

ATC-E
Advanced
Technology Series

eco-ATC-A
Water Conserving
Advanced Technology

eco-ATC-H
Optimum Wet/Dry
Hybrid Technology

Great for large industrial refrigeration projects, the PHC offers layout flexibility and reduced piping.

PHC-E
Parallel Hybrid Condenser

Factory Assembled Forced Draft

EVAPCO's forced draft evaporative condenser lines are equipped with owner-oriented features and benefits for easier installation, maintenance, and operation! Multiple axial fans located at grade in the PMRC offer redundancy and improved drive accessibility. While providing similar drive accessibility, the centrifugal fans in the LSC-E and LRC are suited for low noise or ducted applications.

PMRC
Low Power Axial Fan

LSC-E
Low Sound Centrifugal Fan

LRC
Low Profile | Low Sound
Centrifugal Fan

The same features and benefits of the PMRC line but utilizing patented Ellipti-fin® coil technology to offer water savings benefits.

eco-PMRC
Water Conserving Low Power
Axial Fan

PMC-E Evaporative Condenser with optional external service platform

EVAPORATORS

SSTME Evaporator with long-throw adapter

Ceiling Hung Solutions

Enjoy industrial, low maintenance and easy-to-clean cooling in your food storage and processing facilities with EVAPCO's Superior Stainless Technology E-series evaporators, the only independently certified thermal performance and power rated offering available today.

SSTME
Medium Capacity
Unit Cooler

SSTHE
Reduced Charge Medium to
Large Hybrid Product Cooler

SSTLE
Large Capacity
Product Cooler

SSTXE
Low Profile
Unit Cooler

SSTWE*
Low Velocity Hygienic
Workroom Unit

SSTDE*
Dual Coil Low Profile
Unit Cooler

EJETHE
Medium to Large Capacity
Unit Cooler

EJETME
Small to Medium Capacity
Unit Cooler

EJETXE
Low Profile Unit Cooler

*These models fall outside the scope of the AHRI Unit Coolers Certification Program but are rated in accordance with AHRI Standard 420.

Ultra Hygienic Ceiling Hung Solutions

Ultra Series Industrial Evaporators offer additional design features and accessibility for cleaning beyond those available in the standard SSTME and SSTWE product lines, making them the most hygienic ceiling-hung evaporators in the market.

U-SSTME
Medium Capacity
Hygienic Unit Cooler

U-SSTWE*
Low Velocity Hygienic
Workroom Unit

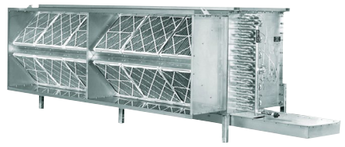

U-EJETME
Small to Medium Capacity
Hygienic Unit Cooler

*This model falls outside the scope of the AHRI Unit Coolers Certification Program but is rated in accordance with AHRI Standard 420.

Custom Design Capabilities

We offer a broad range of unit configurations, engineering expertise and manufacturing capability to design and build virtually any type of non-cataloged custom coil or special unit.

Draw Through Coils
with Inlet Air Filters

Stacked Blast Freezer Evaporator

Packaged Transcritical CO_2 Refrigeration Systems

The flagship transcritical CO_2 Purity line uses a variety of patented technologies to maintain optimal operation while providing high reliability. The Purity systems are available in low, medium and high temperature applications, serving both the commercial retail and industrial refrigeration markets. These systems also offer an efficient, environmentally friendly, and sustainable solution for cold storage facilities of all sizes and smaller industrial applications where previously, synthetic refrigerants may have been used.
All EVAPCO LMP systems are designed and manufactured with simple installation and rapid commissioning in mind.

About EVAPCO SelectTech

EVAPCO SelectTech is a food plant systems integrator specializing in design-build-installation of facility systems, production line integration, process automation, ammonia refrigeration, supervisory systems, and IT integration.

SelectCORE™

SelectCORE is EVAPCO Select Technologies' custom product line. Individually tailored for every end-user's unique circumstances and needs, SelectCORE embodies the high standard Select strives for, from the pre-planning stage to post-project and ongoing support. SelectCORE products are easily integrated into existing or future control systems.

- **Ammonia Refrigeration**
- **Compressed Air Systems**
- **Sanitary Air Handling**
- **Hot Water Systems/High Pressure Sanitation Systems**
- **Oil Recovery**
- **Water/Waste Water**
- **Processing/Production Lines**
- **Packaging/Material Handling**

EvapCORE®

EvapCORE is EVAPCO Select Technologies' standard product line. Designed with versatility and longevity in mind, these standalone PLC systems offer user-configurable setup for faster deployment and commissioning. EvapCORE Standard Solutions are easily integrated into existing or future control systems.
