EVAPCO for LIFE

EVAPCO is more than a name. We are the global innovator in heat transfer solutions for the commercial HVAC, industrial refrigeration, power and industrial process markets. We pledge to make everyday life easier, more comfortable, more reliable and more sustainable for people everywhere.

OUR COMMITMENT

We never stop innovating. We set out to find groundbreaking solutions that transform the way the world works for the better. It’s why we have more than 28 patents worldwide in the last 10 years alone. We also guarantee performance and put every solution through rigorous research and testing to ensure maximum efficiency and reliability.

PROTECTING THE ENVIRONMENT

Innovation and environmental sustainability go hand-in-hand at EVAPCO. Our industrial heat transfer equipment not only conserves natural resources and helps reduce noise pollution, but also features recycled steel content in construction. Our stainless steel units are constructed of panels that contain up to 75% of recycled content and our galvanized units contain over 80%. From sound reduction to water conservation to chemical elimination, we are developing new technologies that deliver ultimate operating advantages to our clients while protecting the planet for every generation to come.

Welcome to EVAPCO…

We are pleased to offer a full spectrum of heat transfer product solutions from 100 percent evaporative to 100 percent dry. These products are available in a wide-range of sizes from the smallest factory assembled units to the largest field-erected products … all available on a worldwide basis. We are quite proud of our full spectrum of global product solutions!

As a respected leader in evaporative cooling technologies, our commitment to Research and Development has led to innovative solutions for our constantly changing world. Solutions that are energy efficient, conserve water and comply with local regulations.

But that isn’t only what makes EVAPCO stand out above the rest. What sets EVAPCO apart from other manufacturers in the Commercial HVAC, Industrial Refrigeration, Power Generation and Industrial Process markets all points back to our team, the EVAPCO family, of which you are a vital part.

EVAPCO associates are fiercely loyal to each other, to our representatives and, most importantly, to the people they serve. We recognize that our customers are at the center of our success and we never take for granted the level of trust that you put in us when it comes to your heat transfer needs.

We demand excellence in everything that we do and we are committed to delivering the highest quality services and products. We’re here to make your job easier, to be your partner and to exceed your expectations.

EVAPCO for Life sums up our commitment. It is our promise that we will always provide you with the most innovative and most reliable products, created and built by the best people in the industry. By choosing EVAPCO, you’re letting us know that we’re doing the best job possible for you.

We thank you, not only for your business, but for inspiring our message. By working together with you, EVAPCO has been able to consistently breed a level of innovation, craftsmanship and professionalism that our competitors find difficult to match! We couldn’t do it without you!

Very sincerely yours,

William G. Bartley
President and CEO

From the smallest factory assembled cooling tower to the largest field erected air-cooled steam condenser, we offer heat transfer products designed to meet the water and energy requirements for any project. We are committed to providing solutions that are energy efficient and conserve water.

Our latest heat transfer solutions are the factory-assembled eco-Air Series of Dry Coolers, Air Cooled Condensers and Adiabatic Coolers and Condensers. The eco-Air Series completes our successful eco-family of closed circuit coolers and condensers with water-saving dry and adiabatic technology.

As an industry leader in third-party performance certifications, our fully-rated products enable you to operate your cooling systems efficiently and with complete peace of mind.
CLOSED CIRCUIT COOLERS

Dry/Adiabatic

The eco-Air Series of Closed Circuit Coolers provides 100 percent dry or adiabatic heat rejection.

- **eco-Air Flat Series**
  Air Cooled Fluid Cooler
- **eco-Air V Series**
  Air Cooled Fluid Cooler
- **eco-Air Adiabatic Series**
  V Series Air Cooled Fluid Cooler with Adiabatic Pads

Factory Assembled Induced Draft

The eco-ATWB line of Closed Circuit Coolers has been specifically designed to dramatically increase both the evaporative and dry modes of cooling. With this revolutionary design, the eco-ATWB’s will save water and energy by increasing the unit’s efficiency.

- **eco-ATWB**
  Water-Conserving Advanced Technology
- **eco-ATWB-E**
  Water & Energy-Conserving Advanced Technology
- **eco-ATWB-H**
  Optimum Wet/Dry Hybrid Technology

**ESWA/ESWB**
Ideal for wet cooling applications where thermal and energy efficiency is of utmost concern.

**ATWB**
The original Advanced Technology provides an induced-draft, axial fan solution for a wide array of cooling applications. Also available in 7” wide containerized boxes.

**MTW**
FRP Molded Construction [International Markets Only]
Factory Assembled Forced Draft

The LSWE and LRWB are the industry standard in low-sound, centrifugal fan, forced-draft closed circuit coolers.

- **LSWE**: Low Sound Centrifugal Fan
- **LRWB**: Low Profile | Low Sound Centrifugal Fan

These water saving eco-units offer improved dry operation on projects with indoor/ducted or confined layouts and low sound requirements.

- **eco-LSWE**: Low Sound Water Conserving Centrifugal Fan
- **eco-LRWB**: Low Profile Water Conserving Centrifugal Fan

ATW Closed Circuit Cooler with optional Smart Shield Water Treatment System
The AT Cooling Tower Series features state-of-the-art induced draft counterflow cooling technology to deliver superior operating advantages in any climate. From performance to maintenance, they simply work harder. Also available in 7' wide containerized boxes.

**AT**
Advanced Technology

**USS/UAT**
Ultra Stainless Steel

**UT**
Ultra Quiet

**AXS**
The Advanced Crossflow Series of Cooling Towers is great for large capacity installations.

**SUN**
EVAPCO continues its dedication to energy efficiency improvements with solar panel technology.

**MTT**
FRP Molded Construction (International Markets Only)
Factory Assembled Forced Draft

These centrifugal fan cooling towers are utilized in low noise, high static or ducted applications and are a good solution for tight enclosures.

LSTE
Low Sound Centrifugal Fan

LPT
Low Profile | Low Sound Centrifugal Fan
Available in a wide range of footprints, motor types, control options and capacities, this complete line of Air Cooled/Dry and Adiabatic products offers unparalleled flexibility.

### Air Cooled/Adiabatic

- **eco-Air Flat Series**
  - Air Cooled Condenser

- **eco-Air V Series**
  - Air Cooled Condenser

- **eco-Air Adiabatic Series**
  - V Series Air Cooled Condenser with Adiabatic Pads

### Factory Assembled Induced Draft

EVAPCO condensers are equipped with low pressure drop and high capacity Thermal-Pak® II Coil design. The patented Ellipti-fin® coil technology further enhances our industry leading performance while saving on water consumption.

- **ATC-E**
  - Advanced Technology Series

- **eco-ATC-A**
  - Water Conserving Advanced Technology

- **ATC-DC**
  - Optimum Wet/Dry Performance

- **PHC**
  - Great for large industrial refrigeration projects, the PHC offers layout flexibility and reduced piping.

- **MTC-A**
  - FRP Molded Construction (International Markets Only)
These products represent the benchmark of industrial refrigeration condenser design. Low noise centrifugal condensers complement the forced draft product offerings. The same features and benefits of the PMC line but utilizing patented Ellipti-fin® coil technology to offer water savings benefits.

**PMC-E**
Low Power Axial Fan

**LSC-E**
Low Sound Centrifugal Fan

**LRC**
Low Profile | Low Sound Centrifugal Fan

**eco-PMC**
Water Conserving Low Power Axial Fan

PMC-E Evaporative Condenser with external service platform.
Enjoy industrial, low maintenance and easy-to-clean cooling in your food storage and processing facilities with EVAPCO’s Superior Stainless Technology-B series evaporators, the only independently certified thermal performance and power rated offering available today.

**Ceiling Hung Solutions**

- **SSTMB**: Medium Capacity Unit Coolers
- **SSTHB**: Reduced Charge Medium to Large Hybrid Product Cooler
- **SSTLB**: Large Capacity Product Coolers
- **SSTXB**: Low Profile Unit Coolers
- **SSTWB**: Low Velocity Hygienic Workroom Units
- **SSTDB**: Dual Coil Low Profile Unit Coolers

*These models fall outside the scope of the AHRI Unit Coolers Certification Program but are rated in accordance with AHRI Standard 420.

**Ultra Low Charge Designs**

Complete with small diameter internally enhanced tubes, these evaporators are designed for applications where minimum refrigerant charge is of utmost importance.

- **SSTSB**: Medium Capacity Unit Coolers
- **SSTEB**: Low Profile Unit Coolers
Custom Design Capabilities

We offer a broad range of unit configurations, engineering expertise and manufacturing capability to design and build virtually any type of non-cataloged custom coil or special unit.

- Draw Through Coils with Inlet Air Filters
- Stacked Blast Freezer Evaporator
- Spiral Blast Freezer Evaporator
HYGIENIC AIR HANDLING UNITS

Hygienic Cooling & Dehumidification

Engineered to deliver conditioned, purified air to critical food preparation, production and packaging areas in your facility. Allow us to solve your hygienic air handling needs with options ranging from HEPA filtration, UV lights, fully wash down welded stainless construction, room pressurization and many more.

CPA
Critical Process Air Systems

SSTP
Penthouse Evaporators

EDF
Make-Up Air Systems
Packaged Low Charge Ammonia Refrigeration Systems

Requiring just a fraction of the refrigerant charge associated with traditional field-built systems, each low charge ammonia refrigeration Evapcold system is expertly crafted as a single-source, quick-to-install solution.

LCR-P-W
Penthouse Refrigeration System
Water Cooled or Air Cooled

LCR-P-A
Penthouse Refrigeration System
Air Cooled & Adiabatic Cooled

LCR-C
Packaged Ammonia Chiller
Refrigeration Packages & ASME Pressure Vessels

Our variety of ASME pressure vessels and recirculation packages offer the latest in microprocessor technology with the Matrix II providing total control for recirculator package pumps, level control and liquid make-up for vessels and system alarms.

MRP

EVAPCO-BLCT – Dry Cooling Technology

EVAPCO-BLCT Air Cooled Steam Condensers

- Two condensers, one structure
- 250-ton double fan module transportation
- Butterfly arrangement to reduce overall height
- Custom engineered systems
- Turn-key solutions
- Modularization for efficient installations
- A strong focus on minimizing costs for traditional construction
Dry/Adiabatic & Heat Exchangers

The eco-Air Series of air cooled and adiabatic condensers offers unparalleled flexibility in a wide range of capacities, footprints, motor types and control options.

- **F Series**
  - Air-Cooled Condenser or Fluid Cooler

- **VFW**
  - Air-Cooled Condenser or Fluid Cooler

- **V Series**
  - Air-Cooled Condenser or Fluid Cooler Adiabatic Pads

Coil Options

- Copper/Aluminum Coils
- Stainless Steel and Custom Coils
- Titanium Coils
Thermal ice storage provides many environmentally-friendly opportunities that are a result of reduced peak electrical demand. Ice storage shifts power demand to low-cost periods thereby reducing energy costs.
