

A low-angle photograph of a large industrial cooling tower with a white body and silver metal piping. The Evapco logo is visible on the tower's side. The background is a clear blue sky with some light clouds. On the right side of the image, there is a decorative graphic of a building facade with blue rectangular windows. A large blue trapezoidal shape is overlaid on the right side of the image, containing the title text.

DATA CENTER COOLING

The Evapco logo, which consists of the word "evapco" in a white sans-serif font inside a blue shield-like shape with a white border. A small green leaf is positioned to the right of the logo.

evapco

for LIFE

FULL SPECTRUM OF

DATA CENTERS ARE A GLOBAL PHENOMENON

As an international company, we understand that every project brings its own unique set of challenges.

You require options that adapt with evolving requirements, efficiently and sustainably—no matter the location.

By partnering with our experienced team of engineers, we can assist you in identifying the cooling solution that will deliver the best possible combination of power usage effectiveness (PUE) and water usage effectiveness (WUE) in any climate.

GLOBAL SOLUTIONS

ENGINEERED FOR MISSION CRITICAL PERFORMANCE AND EFFICIENCY

Our innovations are tested in one of the industry's largest and most advanced research and development facilities in the world, located at the EVAPCO World Headquarters in the USA.

Easily compare your options using the latest data center analysis tool created by EVAPCO. Capable of instantly calculating performance data around the globe, it's another way we're changing the cooling industry with technology for the future, available today.

ADAPT TO ANY ENVIRONMENT

Extremely limited water availability meant this customer needed an option beyond traditional evaporative cooling.

EVAPCO eco-Air Adiabatic Coolers were the optimal solution, allowing the site to achieve its ultra low PUE target while consuming a minimal amount of water. Additionally, these coolers offer:

Low Water Consumption & Maintenance
High Efficiency & Resiliency

This adiabatic technology can be adapted to almost any location!
Visit evapco.com for more details.

ECO-AIR ADIABATIC COOLER

OPERATION:
DRY

ANNUAL DRY BULB DISTRIBUTION

SAVING WATER

18 MW
CALIFORNIA

With a custom solution,
this site's projected WUE
improved significantly!

After installation, EVAPCO
eco-Air Adiabatic Coolers
**reduced water consumption
by 95% AND** eliminated the
need for water treatment.

WET

UTION

When the local municipality reduced this data center's water supply and implemented escalating penalties to ensure compliance, plans shifted rapidly.

We worked with their designers and identified that our eco-ATWB-H Hybrid Coolers were the ideal solution.

With excellent dry performance, combined with exceptional **free cooling** potential, these units drastically reduced water consumption while virtually eliminating the need for chiller operation.

Contact your local EVAPCO sales representative to learn more about the innovative, highly efficient design of our hybrid options.

IMPROVING BOTH PUE AND WUE

ECO-ATWB-H HYBRID COOLER

THE BEST OF BOTH WORLDS

Together with our automated control system, this solution prolonged dry operation to **reduce annual water consumption by 60%** and minimize the requirement for water storage.

WUE

GOING HYBRID

AT ATLAS COOLING TOWER

LOWER ENERGY USAGE

HYPERSCALE SOLUTION

A strictly defined plan area combined with significant cooling requirements (50MW) called for a compact, ultra efficient system. Lead time was also crucial since the data center needed to be operational as quickly as possible.

The AT Atlas modular cooling tower was designed with these challenges in mind. By providing comparable capacity to field-erected units, the site could achieve its low PUE requirements. Faster lead times, as well as fewer piping and electrical connections, allowed multiple cells to be installed quickly.

Compare the Atlas to today's leading cooling options with help from our experienced engineers. Consider the EVAPCO team your partners in providing mission critical cooling.

OPTIMIZING ENERGY

With its modular design, the AT Atlas offers the **highest cooling capacity** and **lowest energy consumption** of all solutions.

50 MW
NEW YORK

GY

Staying at the forefront of technology is just as important to us as it is you. In addition to developing sustainable solutions in our state-of-the-art research facility, we've also produced analysis tools to assist you in creating a holistic view of your cooling system.

Our powerful software can optimize your design process by **calculating annualized performance data** for your location and site-specific requirements. We can provide design engineers with a comprehensive range of **water and energy consumption** data to help identify the best cooling solution for any project. You can expect the final analysis to include:

FREE COOLING POTENTIAL
WATER CONSUMPTION
COOLER POWER
CHILLER POWER
PUMP POWER
AND MORE

LEADING THE INDUSTRY WITH

RESEARCH AND DEVELOPMENT

Tour the Wilson E. Bradley Research and Development Center, one of the largest and most advanced facilities of its kind. Contact your local representative to schedule your visit today.

With our tools, expertise, and global footprint, EVAPCO can help you reach your targets wherever your next data center may be.
