

# HIGH EFFICIENCY DRIFT ELIMINATORS

**EVAPCO's patented\* high efficiency drift eliminators are designed for superior performance resulting in savings on water and water treatment chemicals.**

**Features include:**

- 0.001% drift rate of the recirculating water.
- Inert PVC construction.
- Easy removal for inspection and maintenance of the spray distribution system.

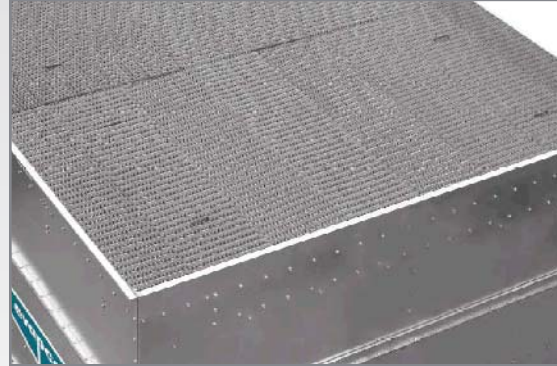

**Missing, damaged, or corroded drift eliminators may result in:**

- Loss of performance.
- Recirculation of discharge air.
- Higher operating costs.
- Increased water and chemical loss.
- Increased maintenance costs.
- Safety issues.
- Damage to surrounded buildings and vehicles.

Call **EVAPCO** at **410-756-2600** for the Mr. GoodTower® Service Center near you.

## EVAPCO's high efficiency drift eliminators are available for:

- Forced draft and induced draft counterflow units
- Crossflow units

## EVAPCO has custom solutions for multiple conditions that include:

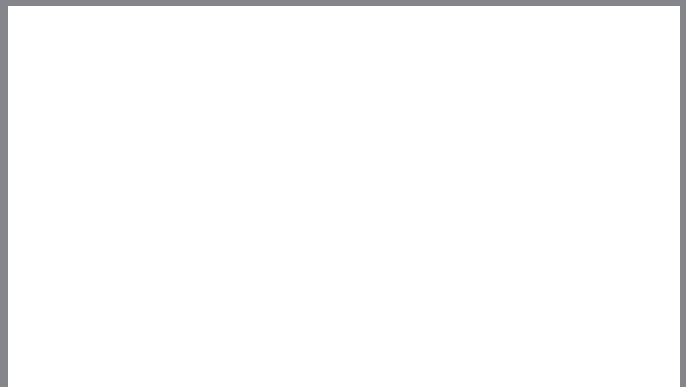

- Multiple materials of construction including high temperature (150°F) HPVC, heavy duty PVC, or galvanized steel.
- Individually framed (steel) assemblies.
- Double-stack arrangements.

EVAPCO will custom design and manufacture PVC drift eliminators with a guaranteed fit for all evaporative cooling equipment regardless of original manufacturer.
